

HandPunch *ttG*

Overview

The ttG HandPunch Terminal is an industrial-strength biometric verification terminal for use in payroll, time & attendance, access control, visitor management, manufacturing, quick-serve and other application environments.

Feature Summary

Using a highly customizable GUI, the embedded terminal application provides a rich environment for punch IN/OUT, LUNCH/BREAK, job transactions, tips, department transfers, validation, schedules, accruals and more. Data from your back-end application can be populated within the terminal, including employee names, validation tables, accrual totals, upcoming schedules and messages.

Equipped with flash-based storage, 3.5" quarter VGA screen and eight soft-buttons, the ttG HandPunch Terminal can be used as a self-help portal for collecting and delivering secure employee data.

Specifications

- Industrial-strength biometric verification
- Fully customizable GUI, with user-defined transaction codes, on-screen prompts, icons and menus
- Data entry with validation
- Schedules and restrictions
- Punch review, add punch, review timecard with totals
- Door and access control (one relay on-board); open eight doors from one terminal using optional ttRelay
- User definable profiles
- Single button enroll with practice mode
- Dynamic thresholds
- Template propagation and grouping with other ttG terminals using the tt3 Host Appliance
- Real-time integration via filecopy, FTP, XML/HTTP, MS Access, MSSQL Server, Oracle and others
- Native languages include: English, French, Spanish, Portuguese, German, Dutch, Italian, Greek, Russian, Japanese, Chinese & Arabic
- Support > 100,000 employees
- Automated time sync, backup, mirroring and discovery

Benefits

Lower payroll costs, streamline job data collection, automate message delivery and provide employee portal with the security of biometric verification.

Zero configuration means your IT staff won't have to endure a new learning curve. Simply plug into a DHCP enabled network, open your web browser and within minutes data will be ready to flow into your back-end application.

ttG HandPunch GT-400 with Ethernet

Maintenance:

ttG-MTNC One Year Comprehensive Software Assurance/Support/Update Agreement/Loaner Devices. One year factory warranty to cover any factory defects. Replacement parts at discounted pricing.

Accessories:

BB-300 Operational Battery Backup w/power management board
PS-110 Power Supply—120 VAC to 13.5VDC w/connector
S-CP-GRAY Replacement set (2) side caps for ttG HandPunch
GT-CELL Internal Cellular Enabled Module
TSP643D-24 Receipt Printer with Cutter & USB Interface

tt3 Host Appliance

Overview

The tt3 Host Appliance provides a powerful management interface for a family of ttG terminals. Using a high-availability, zero-maintenance architecture, the tt3 Host Appliance contains applications for complete discovery, management and configuration of ttG terminals.

Features Summary

Equipped with flash-based storage and no moving parts, the tt3 Host Appliance eliminates the need for traditional server-based management hardware & software. Simply plug the tt3 into your network to start automatic discovery and configuration of all ttG devices.

The tt3 provides grouping, template management, device configuration, device backup, failover, import/export to your application (Time & Attendance, Payroll, Access Control or other). While only one tt3 is required per installation, multiple tt3's can be combined for automated redundancy and failover.

Administration is performed via a web browser interface which provides access to devices, punch history, system log details, printing reports, device profiles and service maintenance. The tt3 Host Appliance can manage from 1 to 100's of ttG terminals.

Benefits

Centralized management allows you to control devices remotely, roll-out changes and updates globally, and streamlines data integration with your back-end application. Insures that data flows from the terminal to the application in real-time.

Specifications

- Small form-factor hardware appliance with no moving parts, high availability and no maintenance
 - Flash storage
 - On-board Ethernet with DHCP and auto-discovery
 - Applications for managing any number of ttG terminals, providing discovery, configuration, backup and archive
 - Automatic redundancy and failover when more than one installed on a network
 - Web interface for cross-platform and zero footprint administration
 - Tools for redesigning terminal GUI, button functionality and other device preferences
 - View and report on punch history, punch archives, system activity, access control logs, enrollment, attempts and failures and biometric performance
 - Manage templates, biometric thresholds, names and grouping
 - Configure integration to back-end applications (Time & Attendance, Payroll, Access Control and others); smart wizard automates sending data via filecopy, FTP, XML/HTTP, MS Access, MSSQL Server, MySQL, Oracle and others
- Note: The tt3 Host Appliance is required if template propagation or grouping is needed between two or more ttG terminals.**
